

IN THE CLAIMS

1. (Currently Amended) A ~~trunk-space~~ storage system for use within the space of a trunk, wherein the trunk defines an opening, a front wall, a rear wall, and a pair of side walls disposed between the front and rear walls, said trunk space storage system comprising:

~~at least one hinge~~ a pair of hinges adapted for attachment to ~~[[a]] the~~ corresponding ~~[[wall]]~~ side walls and near the front wall and opening of the trunk;

a frame operatively mounted to said ~~[[hinge]]~~ hinges such that said frame can be rotated between a deployed position and a stowed position at the front wall of the trunk; and

a storage pouch supported by said frame, wherein said frame is expandable to increase storage space of said storage pouch, rotates upward about said hinge such that said storage pouch opens as said frame moves away from the stowed position toward the deployed position, and rotates downward about said hinge such that said storage pouch bends and folds as said frame moves away from the deployed position toward the stowed position.

2. (Original) The trunk space storage system as in claim 1, wherein said frame further comprises a rigid material.

3. (Original) The trunk space storage system as in claim 1, wherein said storage pouch further comprises a flexible material.

4. (Cancelled)

5. (Previously Amended) The trunk space storage system as in claim 1, wherein said storage pouch is flexibly attached to said frame.

6 - 10. (Cancelled)
